The prestigious Charles Barton Medal is awarded annually to the student who has presented the best fourth year thesis seminar at the School of Engineering.

The seminar will showcase a student, representing each of the disciplines of Chemical, Civil & Environmental, Electrical & Computer Systems and Mechanical engineering, who will present their theses and compete for the honour of being the CN Barton Medal Winner, 2005.

Several other presentations of student theses work will be available for viewing after the CN Barton Medal presentations.

Members of the public and secondary school students who are considering a career in Engineering are most welcome to attend.
